ELSEVIER

Journal of Non-Crystalline Solids 177 (1993) ix–xi

JOURNAL OF
NON-CRYSTALLINE SOLIDS

Contents

Preface vii
Contents ix

Section 1. Fracture and strength of glass and ceramic materials

Photoluminescence imaging of mechanically produced defects in MgO
J.T. Dickinson, L.C. Jensen, R.L. Webb and S.C. Langford 1

Changes in air-exposed fracture surfaces of silicate glasses observed by atomic force microscopy
Y. Watanabe, Y. Nakamura, J.T. Dickinson and S.C. Langford 9

Fracture process zone associated with mixed mode fracture of SiC_w/Al_2O_3
C.-T. Yu and A.S. Kobayashi 26

A numerical analysis of crack propagation in microcracking ceramic and ceramic composites
S.B. Biner 36

R-curve behavior of indentation cracks in silicon nitride based ceramic composite
J.H. Gong, Z.D. Guan and J.J. Wu 46

Observations of inelastic deformation during high-temperature fatigue and failure of a polycrystalline silicon nitride
M.G. Jenkins, E. Lara-Curzio, M.K. Ferber and J.A. Salem 54

The fracture behavior of single-crystal $Y_3Al_5O_{12}$
I.E. Reimanis, J.J. Petrovic and T.E. Mitchell 67

Section 2. Glass structure and modeling

Light scattering studies of glasses in the glass transition region
N.A. Bokov 74

X-ray diffraction studies of multicomponent oxide glasses
A. Musinu and G. Piccaluga 81

Re-examination of detailed structure of alkali silicate glasses based on two types of diffraction data
I. Yasui, Y. Akasaka and H. Inoue 91

Short range order of metaphosphate glasses by X-ray diffraction.
A. Musinu, G. Paschina, G. Piccaluga and G. Pinna 97

Simulation studies of silicates and phosphates
B. Vessal 103

Structures of RF_2–$AlPO_4$ glasses revealed by diffraction and MD calculations
K. Shoji and I. Yasui 125

Computer simulation on the structure and vibrational spectra in Ge–Pb–O–F glass
T. Nanba, T. Miyaji, J. Takada, A. Osaka, Y. Miura and I. Yasui 131

A reverse Monte Carlo study of SiO_2 and B_2O_3 glasses
M. Bionducci, F. Buffa, G. Licheri, A. Musinu, G. Navarra and G. Piccaluga 137

An XAFS study of the poly-carbosilane conversion to Si_xC_{1-x}
N. Umesaki, C. Guy, N. Kamijo, K. Okamura, K. Suzuya and K. Suzuki 147

Raman spectra of TeO_2-based glasses and glassy liquids: local structure change with temperature in relation to fragility of liquid
M. Tatsumisago, S.-K. Lee, T. Minami and Y. Kowada 154

Coordination change of Te atoms in binary tellurite glasses
Y. Himei, A. Osaka, T. Nanba and Y. Miura 164

IR and EXAFS analysis of $x Bi_2O_3 \cdot (1-x)GeO_2$ glasses
R. Capelletti, E. Colombi, G. Antonioli, P.P. Lottici, I. Manzini, G. Gnappi, A. Montenero and P. Parent 170

An EXAFS study of the local structure around Zr atoms in Y_2O_3-stabilized ZrO_2 by the sol–gel method
G. Antonioli, P.P. Lottici, I. Manzini, G. Gnappi, A. Montenero, F. Paloschi and P. Parent . . . 179

Soft X-ray XAFS: local structure of mullite gels prepared from modified aluminium alkoxides
N. Kamijo, N. Umesaki, K. Fukui, C. Guy, K. Tadanaga, M. Tatsumisago and T. Minami 187

IR transmission method applied to the crystallization of gallate glasses and the mechanism of crystallization caused by Ar^+ laser and ^{60}Co γ-ray irradiation
T. Nishida, S. Kubuki and Y. Takashima 193

A molecular dynamics and neutron diffraction study of the structure of Na_2O–B_2O_3 melts
N. Umesaki, Y. Kita, T. Kirihara, T. Iida, T. Fukunaga and M. Misawa 200

Phosphorus oxynitride glasses of variable sodium content
M.R. Reidmeyer, D.E. Day and R.K. Brow 208

Viscous flow mechanism of oxyfluoride glasses related to glass structure
K. Matusita, N. Osawa, M. Koide, R. Sato and T. Komatsu 216

The short-range structure of sodium ultraphosphate glasses
R.K. Brow, D.R. Tallant, J.J. Hudgens, S.W. Martin and A.D. Irwin 221

Mathematical model representing structure–property relationships of glass
J.J.L. Yi 229

Preparation and properties of superionic conducting glasses containing lithium halide
M. Horiuchi, T. Sei and T. Tsuchiya 236

Densities, glass transition temperatures, and structural models resulting from extremely modified caesium and rubidium borate glasses
M. Royle, J. MacKenzie, J. Taylor, M. Sharma and S. Feller 242

The thermodynamic properties of oxide glasses and glass-forming liquids and their chemical structure
B.A. Shakhmatkin, N.M. Vedishcheva, M.M. Shultz and A.C. Wright 249

Advances in the Mössbauer effect for the structural study of glasses
T. Nishida 257

^{29}Si MAS-NMR study of the short range order in alkali borosilicate glasses
J.W. MacKenzie, A. Bhatnagar, D. Bain, S. Bhowmik, C. Parameswar, K. Budhwani, S.A. Feller, M.L. Royle and S.W. Martin 269

Heavy metal fluoride glasses studied by positron annihilation lifetime spectroscopy. I. Comparison of $53ZrF_4 \cdot (40-x)BaF_2 \cdot 4LaF_3 \cdot 3AlF_3 \cdot x LiF$ and $53ZrF_4 \cdot 20BaF_2 \cdot 4LaF_3 \cdot 3AlF_3 \cdot (20-x)CsF \cdot x LiF$
A.J. Hill, P.J. Newman, J. Javorniczky and D.R. MacFarlane 277

Electronic states of modifier ions in silicate glasses
Y. Kowada, H. Adachi, M. Tatsumisago and T. Minami 286

Atomic structure and dynamics of fast-ion conducting glasses
D.L. Price and A.J.G. Ellison 293
Boroxol groups in vitreous boron oxide: new evidence from neutron diffraction and inelastic neutron scattering studies
A.C. Hannon, D.I. Grimley, R.A. Hulme, A.C. Wright and R.N. Sinclair 299
Points of contact between theory and experiment: a comparison of molecular dynamics and neutron diffraction results
Y. Cao, A.N. Cormack, A.G. Clare, B. Bachra, A.C. Wright, R.N. Sinclair and A.C. Hannon . . 317

Section 3. Glass processing and manufacturing

The development and successful application of 100% oxygen–oil combustion for glass melters
J.T. Brown, A. McMahon, C.L. Taylor and D.Y. Yum 324
Electrochemical study of As^{3+}/As^{5+} equilibrium in a barium borosilicate glass melt
T. Hayashi and W.G. Dorfeld 331
Compositional dependence of redox equilibria in sodium silicate glasses
H.D.S.B.K. Kochanowski, C.W. Schreiber, A.B. Morgan, M.T. Coolbaugh and T.G. Dunlap . . . 340
Review of three-dimensional mathematical modeling of glass melting
R. Viskanta 347
An integrated mathematical model of float process
T. Kamihori, M. Iga, S. Kakihara and H. Mase 363
Origin of Na_2SO_4 blisters in sheet glass
C. Sakai, K. Kato, G. Yamane and I. Yamaguchi. 372
Diffusion of water in float glass melts
P.B. McGinnis and J.E. Shelby 381
Southern California's latest approach to air emission reductions for glass furnaces
C.P. Ross 389
Polishing to reveal micro-defects on glass
T. Kasai, K. Horio, T. Yamazaki, M. Komoda, T.K. Doy and N. Kubo 397
High-performance glass for the deep ultraviolet range
D. Ehrt, M. Carl, T. Kittel, M. Müller and W. Seeber 405
Development of glass fiber with high dielectric constant
J. Naka, S. Yamamoto, K. Komori, S. Yamakawa and T. Kokubo 420
Low-temperature deformation of fluoride and oxide glass fibers below their glass transition temperatures
M. Koide, R. Sato, T. Komatsu and K. Matusita 427
A partial conversion of a gas–air fired television furnace to oxy-fuel combustion
A. McMahon and M. Ding 432
